AquaSketch Dive Slate
A combination dive slate and paper scroll, the AquaSketch holds up to 8 feet of waterproof vellum that's stretched across a writing area of 2.25 by 3.5 inches. Once the area is filled, divers can twist a knob for a fresh canvas. The paper can be preprinted with fill-in-the-blank dive log info or other material, and can be erased and reused. A phosphorescent writing surface serves as backlight in low-light conditions, and the unit comes with a graphite pencil, under water eraser, wrist strap and starter rolls of paper.

Sketchy Idea
There's no need to worry about flooded cameras while capturing underwater scenes if you sketch them on an AquaSketch slate. The new slate features rolls of waterproof vellum that can be advanced on rollers underwater. When one screen is full, just turn the knob to get a fresh writing or drawing surface. Besides sketches, the slate is handy for logging detailed notes as a dive progresses, and vellum can be backed up on the phosphorescent writing surface in low-light conditions. Plans can be laser printed on the vellum to reduce chances of error during complex dives. The durable vellum can be erased for reuse or even replaced while underwater. Slates are available in 8.5- by 11- and 5- by 7-inch sizes plus a 2.25- by 3.5-inch wrist-mount model. Learn more at www.aquasketch.com.

MERKITSE MUISTIN VEDEN ALLA
Käytännön aquaSketch-käyttö- ja piirustus on sukeltajan taitojen, tulkinnan, koulutuksen tai vesiluohtoammatin näppärä työväline. Pienempi Minno-malli istuu tärteeseen ja sopii kätensä muistipöytänsä tekemiseen. Suurempi Pallete on pirtäjien työpöytä veden alla: noin 6 metriä vedenkestävää kuultopaperia, 8 värikynää, 2 grafitkynää, terotin ja gyötkelurus. www.aquasketch.com

Aquasketch
Aquasketch represents a leap forward in underwater communication and documentation.

- Unlimited paper capacity making it unnecessary to waste time erasing during a dive
- Holds up to ten feet of waterproof vellum
- Any technical or visual computer input can easily be printed on the vellum.
- All notes and drawings can be saved as originals or scanned into a computer after a dive.
- Phosphorescent writing surface illuminates notes during night dives.

Illustration Underwater

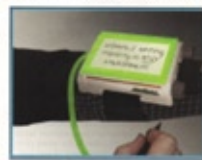

Aqua Sketch comes in two models: the wrist and Pallette. Aqua Sketch drawing tablets are the only practical and effective way to do permanent work in writing, drafting, or illustration underwater. Aqua Sketch represents a new era in environmentally friendly submersible communications. For More information visit www.aquasketch.com.

Marine Technology
May 2008

aquaSketch

The aquaSketch Minno is a new underwater notation device currently in use by NASA in the Neutral Buoyancy Lab at Johnson Space Center, Woods Hole Oceanographic Institute and in testing by the Surface Warfare Division of the US Navy. While aquaSketch represents a breakthrough, the device itself is low-tech, robust and inexpensive. This patented invention was created by a New York artist, musician and inventor, Mark Hagan, who wanted to sketch marine life while scuba diving. Hagan teamed up with members of

the Museum of Natural History and the Mars Rover design team to create aquaSketch.

The aquaSketch Minno is small enough to be worn on the wrist, yet it can hold up to ten feet of waterproof material that is printable, scan-able and reusable.

aquaSketch Minno
What is it? An underwater notebook/sketchpad/communication device created by a New York man who wanted to sketch marine life while underwater. The aquaSketch Minno is used by NASA in the Neutral Buoyancy Lab at the Johnson Space Center. It is Minno is small enough to be worn on the wrist, yet can hold up to 8 feet (2.4 m) of waterproof paper — vellum — that is printable, scannable and reusable. Rubberized knobs spool paper in either direction easily with one hand. The vellum is also available preprinted as dive logs, fish ID charts, photologs, lined or graphed. The frame is indexed in inches and centimeters. In addition, the photophorescent writing surface illuminates during night dives.

Benefits to your diving: If you like noting the aquatic life or anything else you see while underwater, communicating with your dive buddy, or just jotting down a few thoughts, the aquaSketch Minno may be for you. A big plus is that all notes and drawings can be scanned into a computer for permanent storage. The vellum can then be erased using a standard eraser. For more information or to reach the nearest aquaSketch dealer call (800) 282-1608.
